## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

Claims 20-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Independent claim 3 having five lens groups and the specific first lens group structure is supported by the Figure 1 embodiment only. However, the Figure 1 embodiment discloses the optical path bending system comprising the reflecting optical element and six lens components in total (G-3 having two components in that r9-r11 is one component since it is two lenses cemented together and r12-r13 is the second component). Claims 20-21 have now been amended to depend from independent claim 3. The specification as originally filed does not support the limitations of independent claim 3 in a system having the reflecting optical element and seven lens components. Therefore, claiming the limitations of independent claim 3 and further claiming the optical path bending system comprising the reflecting optical element and seven lens components in total presents prohibited new matter.

### ***Allowable Subject Matter***

Claims 2-4 and 6-19 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: none of the prior art either alone or in combination disclose or teach of the

Art Unit: 2873

claimed combination of limitations to warrant a rejection under 35 USC 102 or 103.

Specifically, in reference to independent claim 3, none of the prior art either alone or in combination disclose or teach of the claimed electronic image pickup system specifically including, as the distinguishing feature in combination with the other limitations, the claimed first lens group comprising in order from the object side, a first lens subgroup that includes the reflecting optical element and has negative refractive power and a second lens subgroup that has a positive refracting power.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
